

THE PROBLEM · WHY IT MATTERS

The mouth — a modifiable window into the inflammation behind heart disease & diabetes.

THE PROMISE

Hypothesis → research-ready cohort → self-audited,
non-diagnostic research line. In minutes.

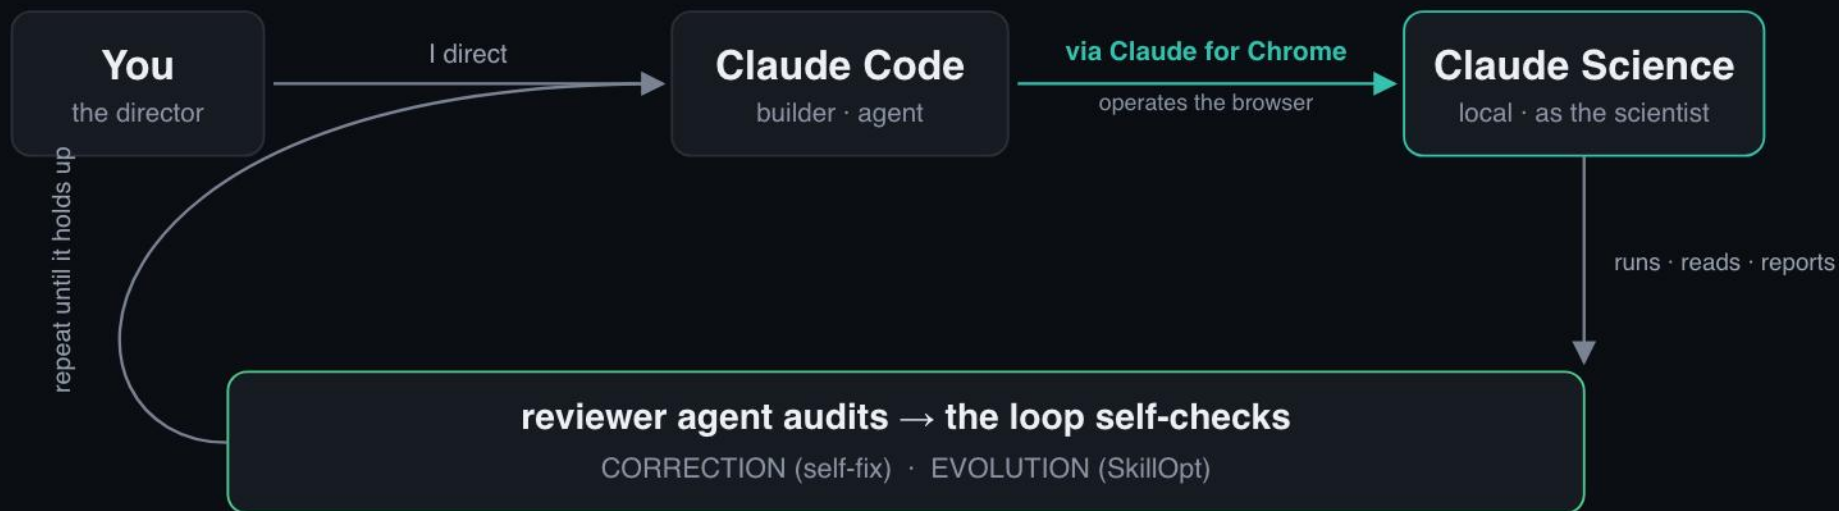

Claude Code wrote it — then **operated Claude Science** itself.

✓tests passing

✓Apache-2.0

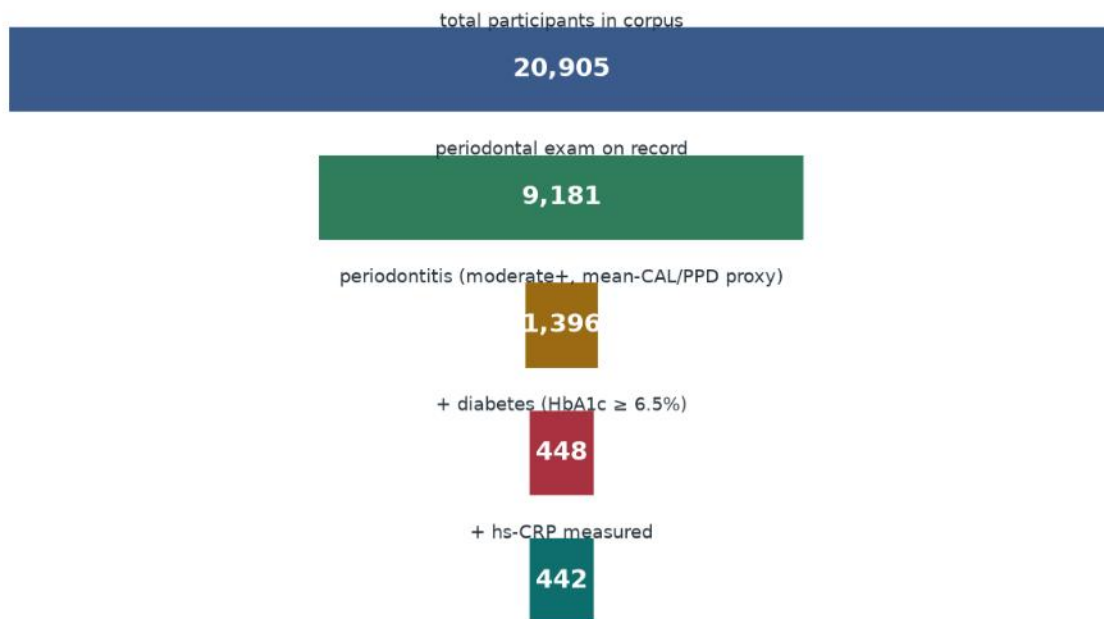

✓outlast the week

A supervised autonomous loop — it evolves and corrects itself.

non-diagnostic · population-level · hypothesis-generating

From fragmented records to a research-ready cohort — 442 participants
real counts over public NHANES 2009-2010 (nothing synthetic)

Research integrity

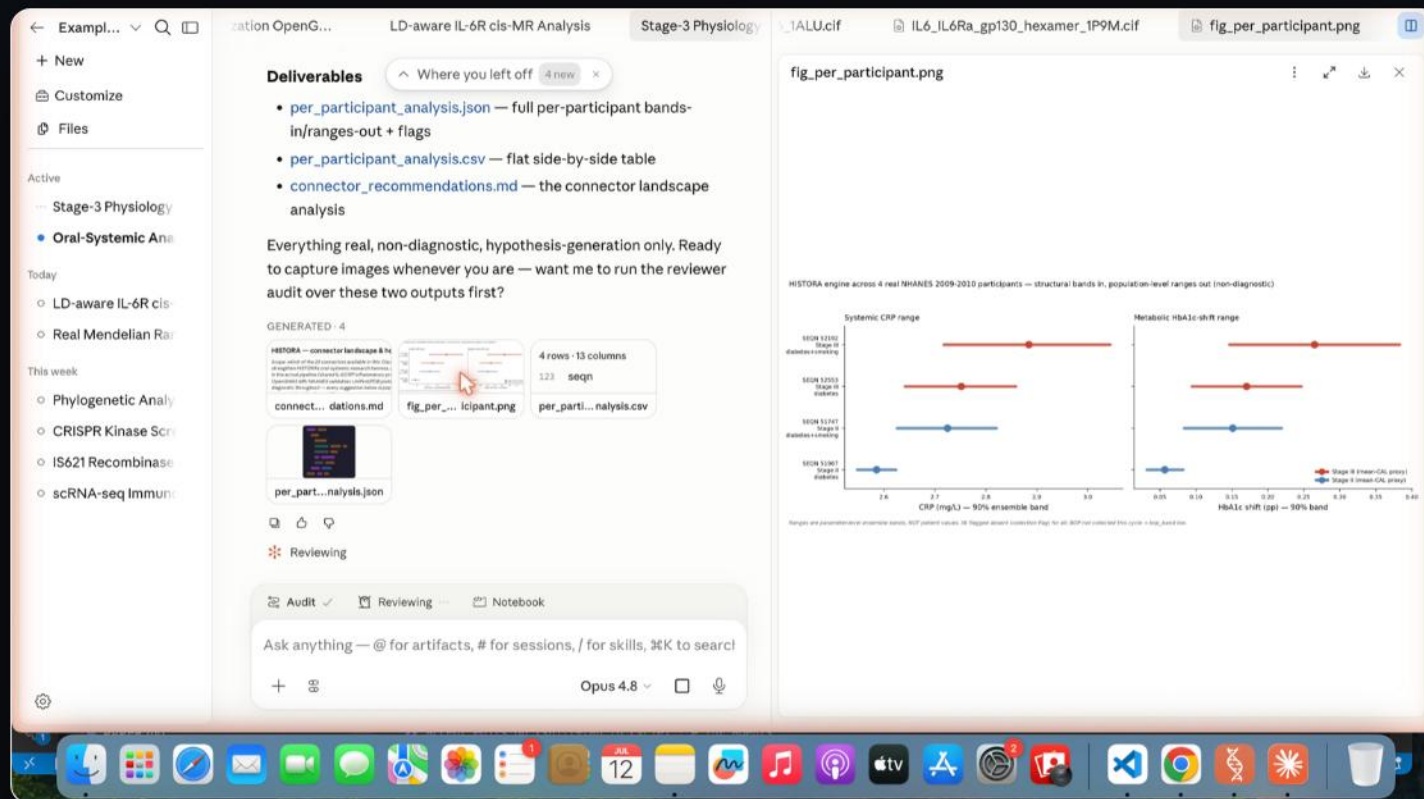

- ✓ Enough data to define a cohort
- ✓ Falsifiable hypothesis posed
- ✓ Valid cross-sectional cohort assembled
- ✗ Establishes causality
- ✗ Provides a diagnosis
- ✗ Recommends a therapy

Cannot answer (cross-sectional → collection flags, never imputed):

- ✗ repeat hs-CRP (post-therapy)
- ✗ follow-up interval > 12 months
- ✗ biologic (e.g. IL-6R blockade) exposure timeline
- ✗ periodontal-treatment date

A research-ready cohort in seconds: 20,905 → 442.

non-diagnostic · population-level · hypothesis-generating

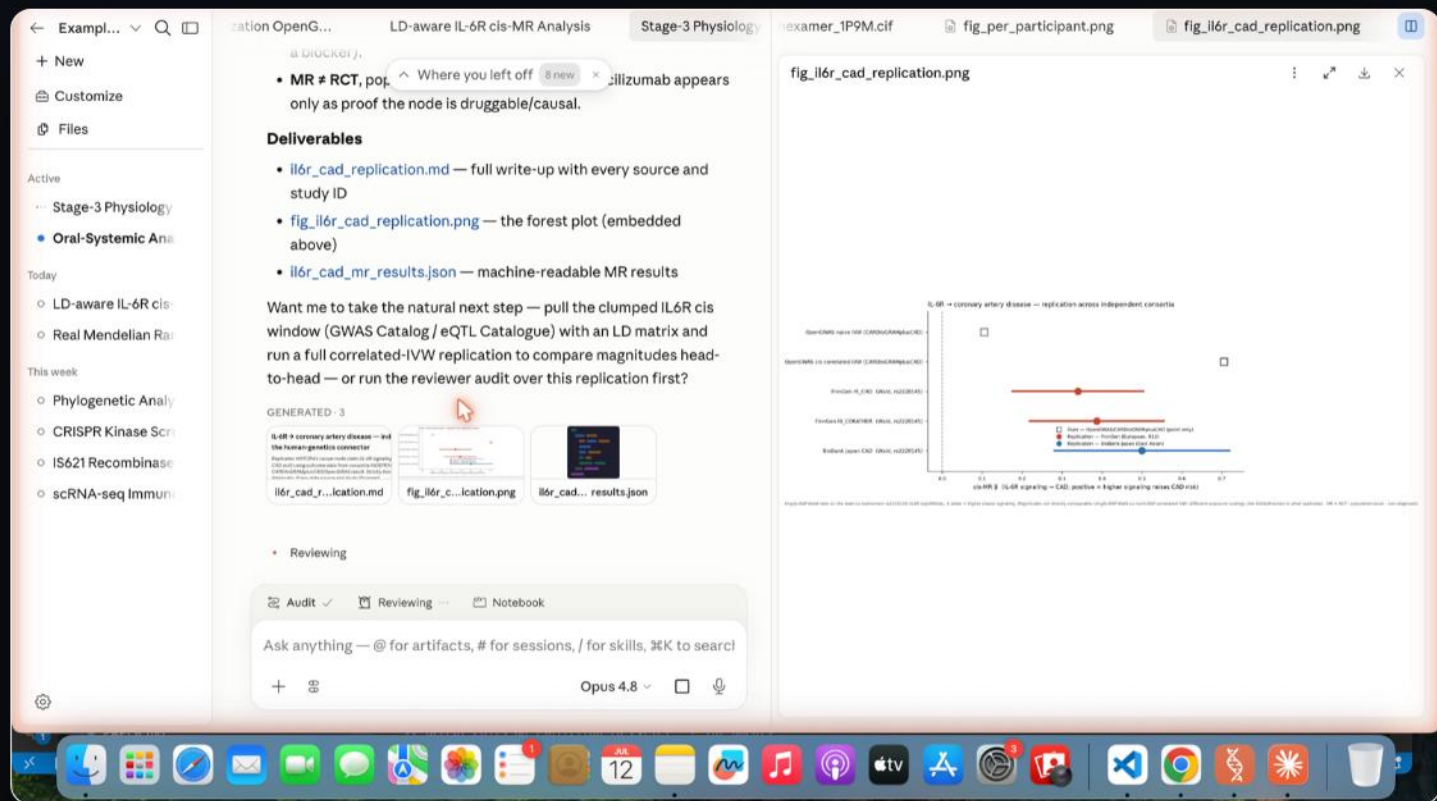

What the data **cannot** answer — a collection flag, never imputed.

non-diagnostic · population-level · hypothesis-generating

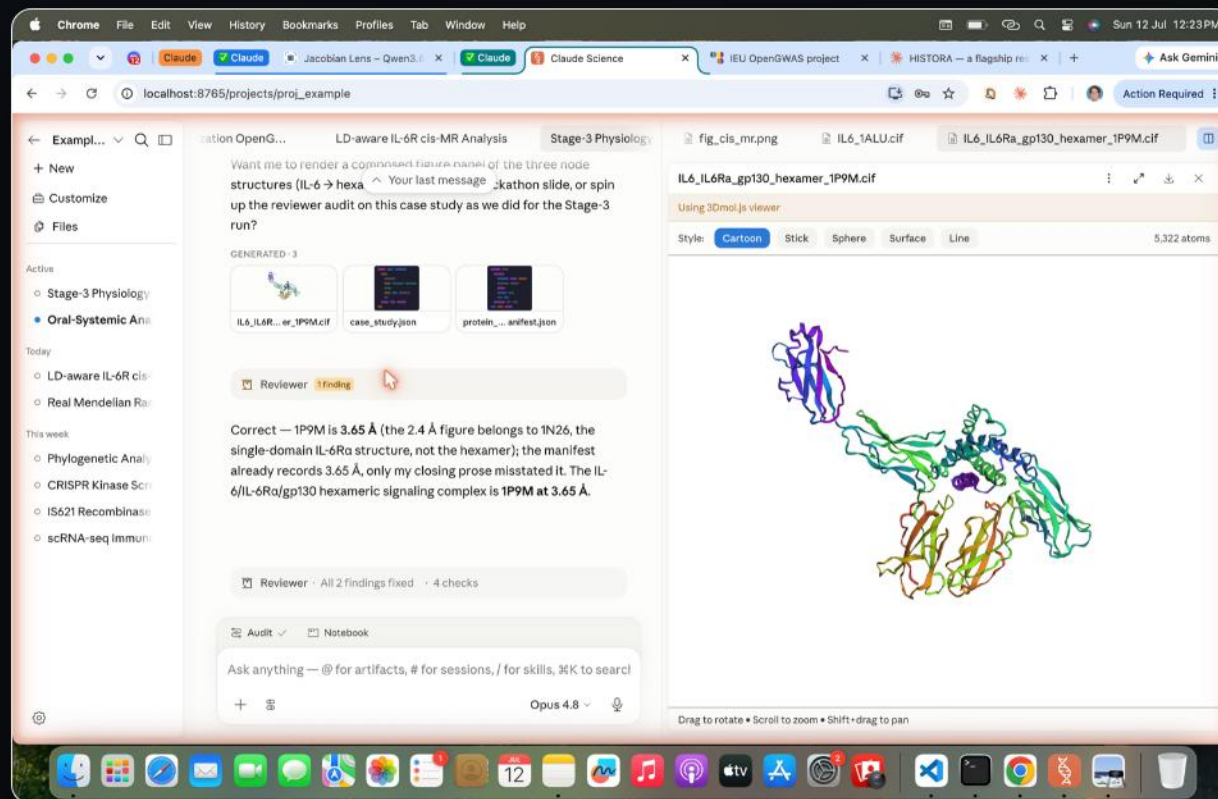

IL-6R → coronary disease: causal. Circulating CRP: **not.**

non-diagnostic · population-level · hypothesis-generating

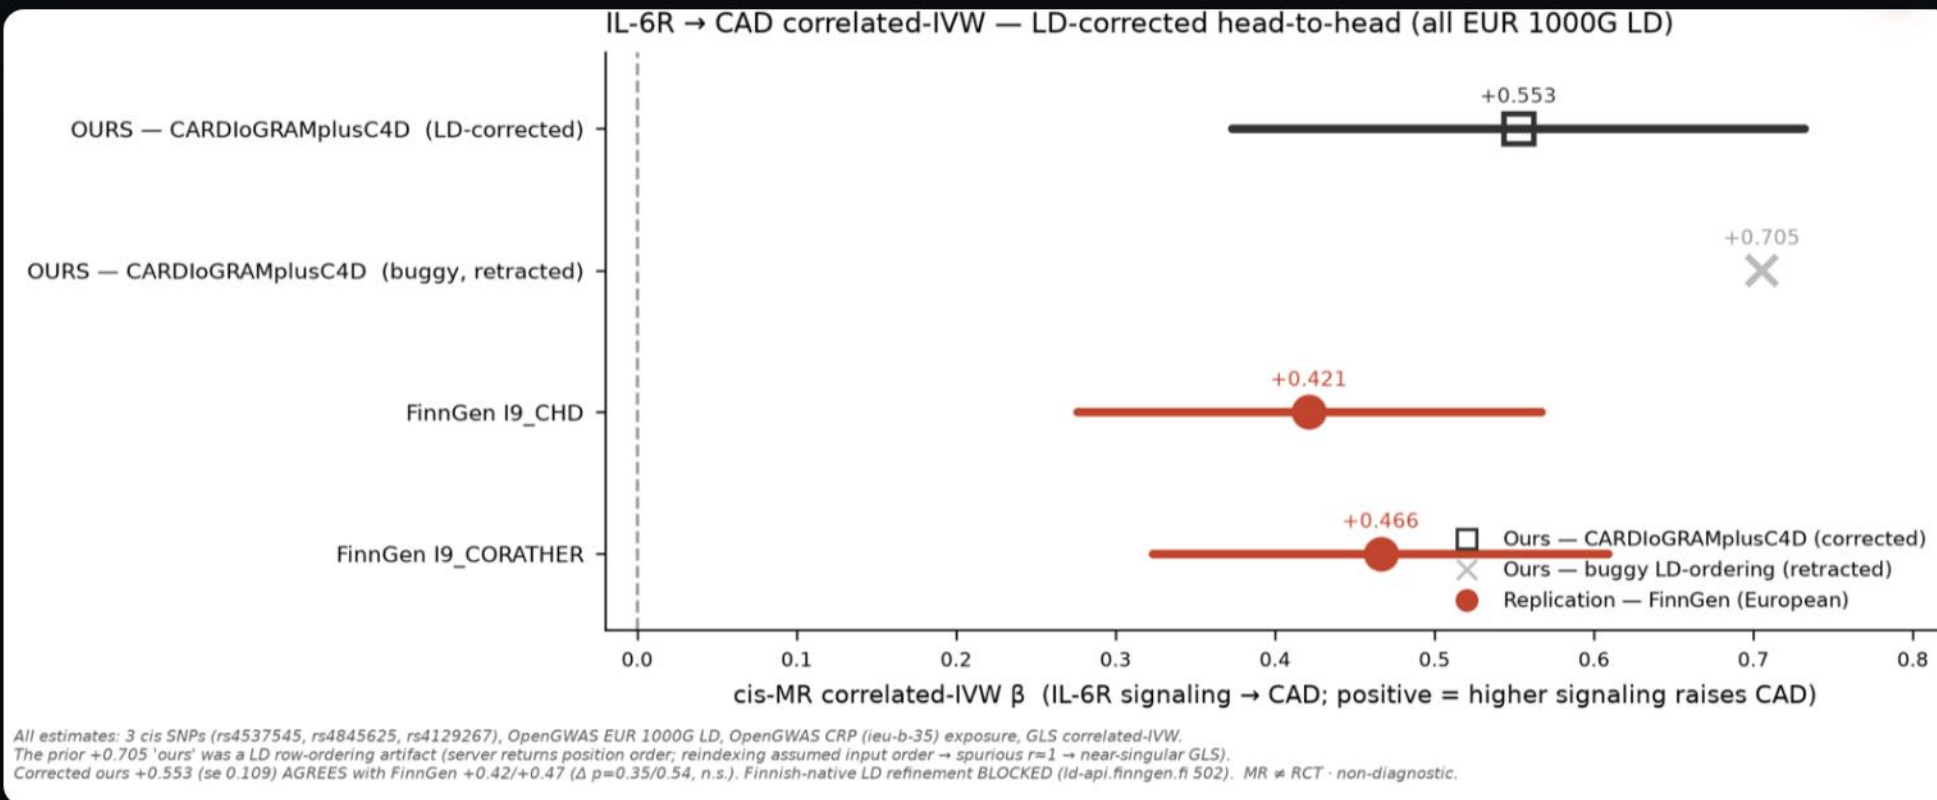

Replicates: **FinnGen (EUR) · BioBank Japan (EAS)**. AD:
exploratory.

non-diagnostic · population-level · hypothesis-generating

Under a **reviewer agent**, it audits its own work.

non-diagnostic · population-level · hypothesis-generating

A bug in its own flagship number: **+0.705** → **+0.553** · regression test.

PROMISE DELIVERED

- ✓ Research-ready cohort
- ✓ Self-audited research line
- ✓ Real public data · minutes
- ✓ Non-diagnostic by construction
- ✓ Runs without us in the room

HISTORA

Clinical Research Copilot · Built with Claude Code, run in Claude Science
